BANKING GATEWAY

The Banking Gateway is a Payment Initiation and Account Information Service that is PSD2 compliant.

PSD2 - Multi Specification Provider

One Interface for all common PSD2 Specifications.

WHAT WE OFFER

Authentication Process

Strong Customer Authentication process is included

Major Banks under PSD2

Interaction with the banks that are most relevant for the market, like Sparkasse and Raiffeisenbanken

Account Information

Aggregate account information like transactions from different banks

Payment Initiation Service

Let's the user send money from and to different bank accounts

One interface, many options

No matter if Berlin Group, STET or your own XS2A-Intercafe, you only have to communicate with one interface

Customizable User Interface

TPP-UI for users and account management for banks

Key Challenge for a Third-Party Provider

The Banking Gateway offers Third Party Providers all common PSD2 Specifications like Berlin Group Open Banking and STET. Third Party Providers and their users can therefore use the Banking Gateway to query account information as well as to initiate payments.

The Banking Gateway Solution from adorsys

The Banking Gateway handles all the XS2A authorization processes for transactions and consents. It provides the uniform interface for TPPs, such as personal finance services (for example account information and payment initiation services).
